

### Strategy Description

mu AI Equity Selection Europe is a European all-cap equity strategy. It is broadly diversified over companies, sectors and countries. The strategy follows a data-driven investment process that combines modern finance theory with machine learning. The investment model undergoes continuous improvements as the result of a rigorous research process.

### Strategy Concept

Our stock selection model: processing large amounts of data with a fully automated system, that builds on machine learning and finance principles.

Our stock selection model has three distinct layers of value creation that build on top of each other, supported by our state-of-the-art data & analytics infrastructure.
